

CCL Components Ltd

the electronic component, cable assembly & power conversion specialist

CCL Components specialise in the Distribution, Manufacture & Supply of Electronic Components, Cable Assemblies and Power Conversion Products. As an independent distributor, we can source, supply and manufacture exactly what you require, rather than offer you a product range that may not satisfy your needs. We prefer to work in partnership to establish your requirements and add value to your business.

We also have an eCommerce website at www.thePowerStore.co.uk for online purchasing of many products, datasheet downloads, quotation requests and bills of material uploads to assist in taking care of your needs 24/7.
